

Sponges

Red line = Cutter line

Dark grey = Required design bleed for Full Colour

Necked 'Car' Sponge

Size: 155mm x 80mm x 40mm

Sponge colours available:

White fine cell foam and Yellow "sea sponge" effect

For screen printed items the print must be a minimum of 6mm inside the cutter line and a maximum 25% ink coverage. We need to view artwork before committing to a screen printed order as due to the very porous surface of the sponge material, some designs may not work.

For full colour items edge to edge printing can be achieved. Artwork must have a minimum 6mm bleed out as shown. (Preferred artwork format is .eps in CMYK colour mode)
