Visual not to scale

To ensure that the artwork is correct, please remember to check all aspects of the design including layout, position & spellings. We require Pantone references and these will be matched to the closest in house ceramic colours we have available. Due to monitor and print setups the colours may appear slightly differently so we cannot guarantee an exact match to the electronic visual.

If your order is on our Fast Track or Priority service please note the colours are matched to the nearest inhouse pantone colour and are taken at clients own risk.
